# Burton Pride 2026 - Weather Policy

At Burton Pride, the safety, wellbeing, and comfort of our visitors is one of our highest priorities. With warm temperatures and extreme weather conditions forecast during the week of the event, we have introduced this Weather Policy to help everyone enjoy the day safely.

As a temporary measure for Burton Pride 2026, visitors will be permitted to bring water and soft drinks into the event. This decision has been made to help attendees stay hydrated throughout the day and reduce the risk of heat-related illnesses.

All drinks brought into the event must be contained in plastic bottles only. Glass bottles, glass containers, and any other breakable drink containers are strictly prohibited and may be confiscated by event staff or security.

Please note that this policy applies only to water and soft drinks. Outside alcoholic beverages remain strictly prohibited. Any alcohol consumed at Burton Pride must be purchased from the licensed bar or authorised vendors operating at the event.

We strongly encourage all visitors to take sensible precautions during the warm weather. This includes wearing plenty of sun cream, bringing appropriate sun protection, drinking water regularly, taking breaks in shaded areas where available, and looking after friends, family members, and fellow attendees throughout the day.

If you begin to feel unwell due to the heat, please seek assistance from a member of the Burton Pride Committee, a volunteer, security staff, or the event first aid team immediately.

Burton Pride is a community event created by the community, for the community. We want everyone to have a fantastic, safe, and enjoyable day celebrating together. Your wellbeing matters to us, your safety matters to us, and most importantly, you matter.

By attending Burton Pride 2026, all visitors agree to follow this Weather Policy and any instructions given by event staff, volunteers, security personnel, or first aid teams relating to health and safety during the event.
